## FoxPhone for Law Enforcement

[www.tacticalmobileapps.com](http://www.tacticalmobileapps.com)

With more than a decade of experience, we offer an ultra-simple, ultra-secure mobile device monitoring solution for use in Undercover & Intelligence operations. FoxPhone is the only product of its kind that offers Consensual Call Recording, Real Time device intercept, Location Tracking & SMS backup in a single, easy to use, cost effective service.

# TAKE YOUR UC OPERATIONS TO THE NEXT LEVEL – FOR LESS

FoxPhone is a street tested, extremely reliable mobile application designed to provide a variety of functions for Law Enforcement & Under Cover operations including:

Consensual Call Recording, Audio & SMS Storage/Backup, Real Time Device Tracking & Real Time Device Audio Monitoring all in one easy to use, cost effective Mobile App / Service. FoxPhone is developed by Killer Mobile (R), a company with over 10 years of experience developing sophisticated, high quality security & productivity products in the mobile space.

Our products have been tested & mission proven worldwide by Law Enforcement Agencies, Governments & Corporations. But don't take our word for it, contact us and we'll happily set you up with a no cost, no obligation demo.

FoxPhone turns your ordinary Android or iPhone into a powerful **UC monitoring tool**

**Real Time Monitoring**  
& Intercept of Audio, Location/GPS, Calls & Messages

**Fast & Simple Setup**  
& Very easy to use = Your IT Guy Will LOVE This!

**End to End encryption**  
throughout the entire system.

# CROSS PLATFORM COMPATIBLE

FoxPhone runs on:

- ✓ Android
- ✓ Android Tablets
- ✓ iPhone
- ✓ iPad

\* Versions available for non-Jailbroken & Jailbroken iOS devices

# AMERICAN MADE & HOSTED IN YOUR LOCATION FOR ULTIMATE SECURITY

Our system can be installed on your own servers, rather than using any external or cloud capacity.

This means that your backend panel will be connecting directly to your own internal servers or optionally your own secure Amazon Web Services (AWS) instance - meaning no data leaks.

We've built our system with no backdoors, meaning maximum security.

This also means, that unlike competing solutions, you won't be paying per minute fees, meaning you can *monitor more all while paying far less*.

For total security, unlike most competitors, FoxPhone can be hosted on **YOUR** servers, avoiding data leaks & ensuring the utmost privacy.

## INSTALLED IN MOMENTS

Our super simple set-up means you can install everything you need to get started on your own LAMP (Linux, Apache, MySQL, PHP) server on-site in a matter of minutes. It's a simple self-install, meaning neither our staff nor any external contractors will need to access your premises. However we'll be more than happy to assist with deployment if needed.

Getting the software onto phones is just as simple. It works by using the device's browser to visit a custom URL that will automatically install the correct version of FoxPhone for the platform concerned.

## THE PERSONAL TOUCH

Unlike our so-called competitors, we can customize Fox- Phone to meet the specific requirements of your organization.

We are happy to talk to you at any time before or after you buy FoxPhone and if you need any changes made, rest assured you'll be speaking to people with the power to make that happen.

# FOXPHONE IS THE MOST FEATURE RICH, POWERFUL LAW ENFORCEMENT MOBILE APP AVAILABLE.

- ✓ **Consensual Phone Intercept / Real Time On-Demand Audio Monitoring** including a Backup Phone Intercept Method when Data Connectivity is not Available
- ✓ **Consensual Call Recording** in a variety of audio formats, including MP3, WAV & More. This allows you to record & retain call audio that can sometimes be critical to your mission.
- ✓ **Message, SMS & Call Log retention.** Many Departments now require that communications are stored. FoxPhone makes this automatic and therefore saves you massive amounts of time.
- ✓ **Real Time Device Location/GPS Tracking.** You'll always know where your UC Agent or Phone is, in real time. Plus, with FoxPhone, all of this data can be logged & stored for later use as additional evidence. FoxPhone can even Geo Tag Calls, SMS's & Intercept Audio.
- ✓ **Super Simple** - One: Install the application. Two: Setup monitor access credentials. Three: Start Monitoring

# COMPETITION? WHAT COMPETITION? SIMILAR PRODUCTS DON'T EVEN COME CLOSE!

## *What Sets **FoxPhone** apart from the rest?*

*#1 No application required to Monitor UC device. Access the audio stream / UC device from any Browser even from your mobile phone*

*#2 UC Device (running FoxPhone) is fully functional even while being monitored. Why would you want your agent's device to be a brick? With FoxPhone, even when being monitored the device is fully usable, for calls, messaging or anything else.*

*#3 Calls Made or Received while UC Device is being monitored are automatically included in the audio stream. Absolutely no other product can do this.*

*#4 Unlimited authorized users can access the live audio stream simultaneously \*When self-hosted*

*#5 No Per Minute Charges. Your Missions, Operations and most importantly your Agents are far too important. Since FoxPhone is ran through a secure AWS instance or your own Data Center, you can use it as much as you want, whenever you want. Our system has been highly optimized to ensure your AWS bandwidth charges will be more affordable than you think.*

# FOXPHONE IS ONLY AVAILABLE TO US LAW ENFORCEMENT & GOVERNMENT AGENCIES AND IS IDEAL FOR USE AS:

- ✓ Mobile Bug/Wire
- ✓ Undercover Phone/UC Device
- ✓ Snitch Phone
- ✓ Mission Data Backup/Storage/Retention
